At the call site
shape is known now:
m dynamic, n/k fixed
rank tile candidates:
waves, cluster, last wave
DeepJIT
emit kernel.cu with
~25 constants
digest -> cache hit loads
cubin, miss runs NVCC
Launch
driver launch with
cluster and PDL
SM budget, tc_util and
determinism already baked
Disk cache keyed by the digest
source · tracked includes · NVCC version · effective flags · post hook (published by atomic rename)
